EDUCATION

Indian Institute of Information Technology

B.Tech (Hons.) in CSE - CGPA: 9.41/10.0

Sri City, Andhra Pradesh

Aug. 2023 – June 2027

EXPERIENCE

Hoffero TravTech LLP, Singapore (Remote)

May 2025 – Oct 2025

SDE Intern

Node.js, Flutter, Firebase, GCP

- Automated **Instagram engagement** by routing webhook events through Google Cloud Functions, with the **deployed webhook handling 1M+ requests over 14 days at a 99.994% request success rate**.
- Built an **MCP server** to decouple the chatbot from backend integrations, exposing **5 reusable tools**.
- Secured **Meta Graph API integrations** with a backend proxy, removing client-side credential exposure and centralizing authenticated requests.
- Optimized the **AI Trip Guide** with a **two-level geocoding cache** using in-memory storage and Firestore persistence, eliminating redundant external lookups and reducing API overhead during itinerary generation.

PROJECTS

Milestone | *React.js, Node.js, Redis, MongoDB, Jest, Docker*

[GitHub](#) | [Live](#)

- Developed a full-stack freelance marketplace with **role-based access control (RBAC)** for employer, freelancer, moderator, and admin workflows, enforcing server-side authorization across protected APIs.
- Optimized **MongoDB query performance** with compound indexes, pagination, projection, parallel query execution, and $O(n^2)$ -to- $O(n)$ hash-map lookups.
- Improved backend responsiveness with **Redis caching**, achieving up to **17× lower API latency** in benchmarks, and automated reproducible VM deployments using **Docker, Nginx, and GitHub Actions CI/CD**.

Cove | *React.js, Node.js, PostgreSQL, pgvector, Gemini SDK, RAG, MCP*

[GitHub](#) | [Live](#)

- Built a multi-agent research application that retrieves information from **academic and web sources, validates results, and generates citation-backed reports in under 60 seconds**.
- Implemented a **verification pipeline for claim extraction, source validation, confidence scoring, and contradiction detection** before report generation.
- Improved information retrieval by indexing documents in PostgreSQL, removing duplicate sources, and ranking relevant results before generating reports.

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript, Dart

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Web & Mobile: Next.js, React.js, TypeScript, HTML, CSS, Flutter

Backend: Node.js, REST APIs, GraphQL, WebSockets

Databases: PostgreSQL, pgvector, MySQL, MongoDB, Firebase Firestore

Cloud & Tools: Git, GitHub, Docker, Linux, GCP, AWS, Redis, Jest, Postman, Nginx

LEADERSHIP & ACTIVITIES

Google Developer Group (GDG) Campus Lead: Led a community of 1000+ student developers by organizing 8+ technical workshops, hackathons, and learning initiatives including Google Cloud Jam (100+ completions), enabling hands-on learning.

ACHIEVEMENTS & PUBLICATIONS

- Competitive Programming:** Solved 500+ problems across different coding platforms, achieving a peak rating of 1887 on LeetCode and 1276 on Codeforces.
- Flipkart GRiD 7.0:** Advanced to National Semi-Finals out of 100,000+ participants across India.
- Academic Excellence Award:** Received thrice for maintaining an excellent CGPA.
- Research Publications:** Published a paper at **ICAART 2026 (CORE B-Ranked Conference)**, including a study on reward shaping and exploration strategies for Deep RL agents.
- App-a-thon 2024:** Won 2nd Runner-Up among 50+ teams at iLabs, Hyderabad.
